The only reproducible system

"The mind that opens to a new idea never returns to its original size."
Albert Einstein

The tailor-made therapy

biot
technologies for life

CIEM System

A technology based on the principles of quantum physics, that uses information and energy to improve health and well-being on all levels.

The CIEM System is the easiest and most efficient **informational and energy biofeedback** system available. It includes hardware and software to evaluate a client's current emotional, mental, physical and energetic status taking advantage of a multidimensional point of view. The **very fast** and advanced analysis gets at the core of the issue, allowing the client to immediately receive a treatment through **specific information and frequencies** broadcasted using **sound, electromagnetism, light and colour** using the devices supplied.

Strengths

Evaluation and Treatment

The CIEM System is not only an **evaluation** tool, but it is mostly used as a **treatment** system. Compared to other devices, the system is capable of stretching beyond the analysis capability and directs the client towards a healing path, through a tailor-made therapy.

Largest database on the market

Comprehensive database with over **150,000 evaluation resonances**, more than **2,000 disease specific frequencies** (Rife and Clark databases), and the most complete selection of advanced client-specific frequency sequences (like Fibonacci or Solfeggio sequence, Binaural Tones, different Musical Scales, Harmonic Interferences…). All these features make the CIEM System the best on the market, the first of its generation, with the highest potential.

Easily customizable database

The CIEM System is open and **customizable** beyond the standard database. It can quickly and easily be adapted to complement and enhance any type of practice.

Reproducible analysis

The results obtained through the CIEM System have the highest **reproducibility** on the market and this guarantees reliable and functional analysis. It is possible to monitor the client's results along the path to recovery.

Modular and scalable system

Each system can work independently. It is possible to start from a single basic system and add additional components, depending upon your own needs and interests.

Managing Clients and Optimizing your practice

Since each system can be used independently, **several clients can be treated simultaneously**, reducing analysis time and, as a result, **improving your practice efficiency** and allowing for a high return on the initial investment.

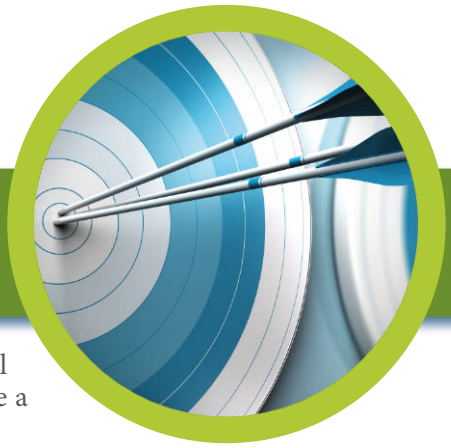

Manuals and Training

There are many courses available (basic, advanced, individual, national and international) that provide **permanent and continuous training** held by **physicians**, **therapists** and bio-engineers in a multidisciplinary and integrated approach. All systems are provided with complete technical and protocol manuals, with full descriptions of this effective approach. A new integrated video-training platform allows for easy and complete e-learning.

"If you want to understand the secret of the universe, think in terms of energy, frequency and vibration"
Nikola Tesla

Who can use the system

Thanks to its modularity, the CIEM System can be equipped with several accessories. The software is also customizable and can be used to improve a wide variety of practices such as those listed below.

- **General and specialized medical practice, C.A.M. and odontology** - outstanding ability to support diagnosis and treatment protocols for complex disorders and chronic conditions.
- **Physiotherapy, Massage therapy, Osteopathy and Chiropractic** - it is possible to combine CIEM hardware with manual treatments in order to provide "intelligent" energy treatments focused on treatment for pain, inflammation, tissue rejuvenation and healing.
- **Psychology, Psychotherapy, Psychiatry** - CIEM allows easy access to the informational pattern of the client, to the underlying causes of conditions and to treatment via informational medicine to helping release mental and emotional blocks.
- **Homeopathy** - to find the resonant remedy for the client and their symptoms, seeking for the "simillimum" in one click.
- **Naturopathy and Phytotherapy** - it is possible to create customized remedies through a large database that includes natural medicine, nutrition, herbal and floral essence modules.
- **Acupuncture and Traditional Chinese Medicine** – Specific Hardware and Software to practice Acupuncture without needles; elevate your TCM practice to an unthinkable level until a few years ago, instant meridians evaluation, scalp, dental and ear acupuncture evaluation; it includes Chinese herbs and many other groups.
- **Ayurvedic medicine** - optional dedicated modules and advanced courses taught by the best teachers, with explanations of the scientific connections between the HRV (Heart Rate Variability) and the pulse reading.
- **Applied kinesiology** - the CIEM software improves the kinesiology practice.
- **Holistic operators for health and wellness** - amazing benefits for anyone interested in a truly holistic approach to health and wellness, working on physical, mental, emotional and spiritual levels.
- **Veterinary** - extensive veterinary database to treat pets like dogs, cats, pigs, horses, cows, birds and other animals in general. It provides useful information regarding animal-owner relationship.
- **And Homotoxicology, Iridology, Anthroposophic Medicine, Counselling, Coaching, Training…**

Since the system is open and includes many modalities, each practitioner is able to approach a client's condition in a **truly holistic and integrative way.**

Systems configurations

The CIEM System has four basic configurations, all independent and interconnectable, for different approaches, so that all four can be combined according to the specific needs of the therapist.

Energy Analysis System (EAS)

The complete system to analyze the Energy Field of the human body.

EAS consists of **three devices**: the **Bio-Well**, the **Energy Acupuncture Ryodoraku Tester and Stress Locator**. The combined use of these three technologies allows for a complete and fast **analysis of the human energy biofield** and a **treatment** that meets the specific needs of each customer.

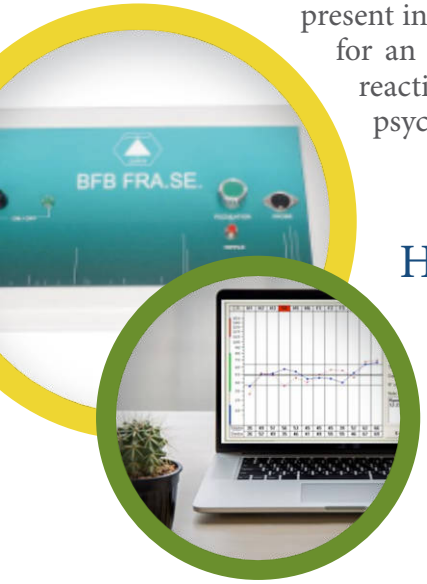

Bio-Well

Bio-Well uses the powerful **Electro-photonic Imaging (EPI)** technology to illustrate the stress and energy level of the person. The **feedback**, obtained in real time, **provides easily interpretable data and graphs** and shows the positive and negative factors that influence the levels of stress and energy.

Energy Acupuncture Ryodoraku Tester

It is a class I medical device, usable by doctors and health and well-being operators, that allows for an assessment of the energy status of the customer, starting from the measurement of the energy present in specific points of the hands and feet, the **Ryodoraku** points. The system allows for an accurate **evaluation** of the state of the energetic **homeostasis**, the biological reactivity of the patient, and indicates possible physiological, aesthetic and psychosomatic alterations.

HRV Stress Locator

This technology consists of an application that reveals the **physical and mental state of the customer** through a **Bluetooth pulse oximeter** or through the camera of a smartphone or tablet.

The app measures, in addition to the heart rate, the oxygenation of the blood and the **real-time energy trend of the nervous system.**

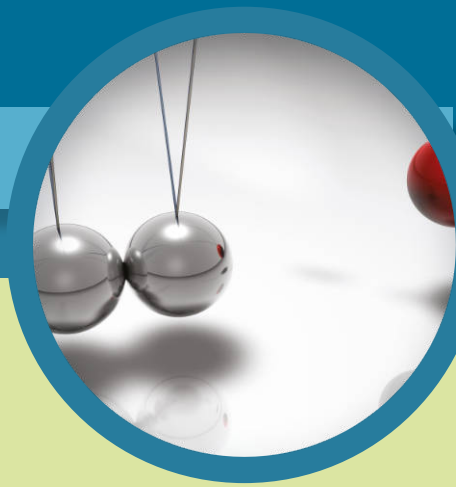

In summary:

- ***Consists of three technologies:*** *Bio-Well, Energy Acupuncture Ryodoraku Tester and Stress Locator;*
- ***Analyzes*** *the energy field of the customer;*
- ***Easily interpretable*** *with complete data;*
- *Suitable for* ***working in combination*** *with FS, BRS or IS systems.*

Informational System (IS)

Communication system at the highest levels

Consisting of a powerful software, that includes over 150,000 resonances in its database, the IS System allows for an **informational evaluation** of the client from different points of view (physical, energetic, informational, emotional/mental, spiritual). In a **short time** it is possible to get a complete overview, based on **reproducible data.**

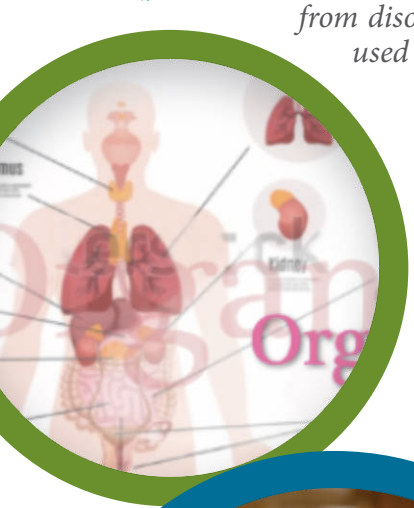

Starting from this evaluation, the therapist can set the **individual communication treatment,** broadcasted via information or sound/frequency.

In order to meet the specific needs of some practitioners, there are several additional packages:

- ***Acupuncture and Traditional Chinese Medicine Module*** *providing qualitative information about the energy state of the 12 main meridians of the person and the indications of treatment;*

ORGANS
categorie fisiologiche
essenze floreali *cromoterapia*
omeopatia veterinaria
agopuntura ALLERGIE integratori
intolleranze alimentari
detossificazione emozioni
AYURVEDA cromoterapia
agenti patogeni

- ***Visual bilateral stimulation software (VBS)*** *very useful in subjects suffering from disorders like post-traumatic stress and strong depressive states; is known to be used in kinesiology, in EMDR, and also in visual rehabilitation of athletes;*

- ***Body Scanner software****, the software allows for the graphic display of the points to be dealt with, the professional can thus easily locate the point indicated without wasting time.*

<u>In summary:</u>

- ***Informational evaluation*** *of the client in presence or at distance ("non local analysis")*
- ***Large database*** *fully expandable and customizable (containing over 150,000 resonances)*
- ***Personalized treatment*** *through informational communication and sound/frequency treatment*

"Nature is a book written in the language of mathematic"

Galileo Galilei

Frequency System (FS)

Treat clients with the mathematic of frequencies

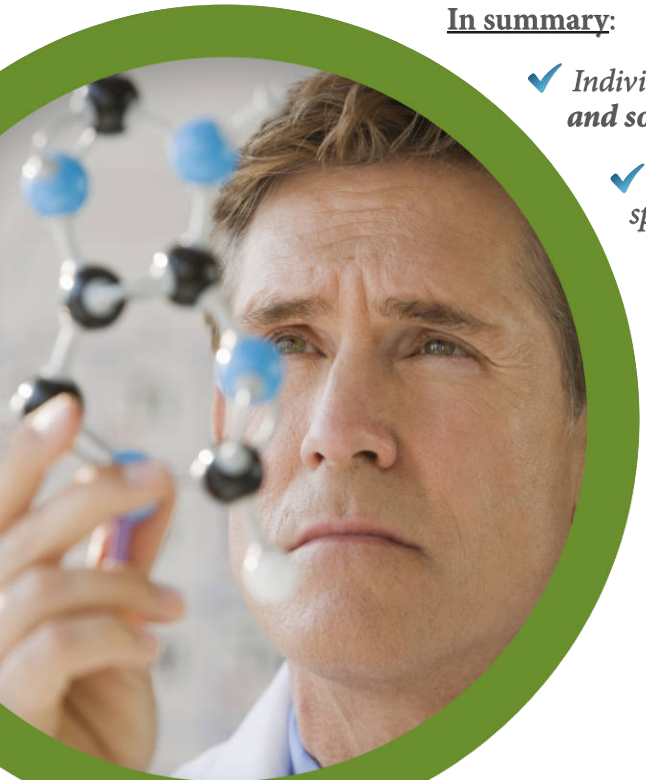

A Unique **Dual-Channel** Interference and 3D Polarity System with automatic setting, the Frequency System allows you to broadcast customized frequency treatments using different forms of energy – **sound, electric, magnetic and light** - in two ways:

- *Single channel treatment:* using the FS you can broadcast any informational treatment set through the IS system for a more rapid and effective approach. In addition, you can utilize a database of more than **2,000 disease specific frequencies** presets related to specific disorders (including the complete database of Rife and Clark), to improving certain conditions immediately, through a sort of "electromagnetic remedy" **without side effects.**

- *Dual channel treatment:* uses the interference generated by two different output channels, thanks to the 3D Polarity System, working with specific frequencies and mathematical sequences such as the **Fibonacci or Solfeggio sequence, Binaural Tones, different Musical Scales and Harmonics,** all broadcasted through two separate and independent frequency channels and combined in specific protocols, helping the therapist in a conscious and targeted use.

The Advanced Frequency panel allows choosing from several parameters (type of wave, amplitude, phase, frequency), as well as to find the resonant **individualized treatment for each customer** based on the analysis results with the hologram generator.

<u>In summary</u>:

- ✔ *Individualized treatment of the client using **electricity, magnetism, light and sound***
- ✔ ***Individualized scanning** of the client for **detection** of the resonant specific treatment*
- ✔ *The unique with **Dual Channel Interference** and **3D Polarity System***
- ✔ *Large frequency database for the treatment of specific disorders (Rife and Clark)*
- ✔ *Ability to **interface with the IS, BRS and EAS systems,** to offer an integrated path for individual evaluation and treatment*

Bioresonance System (BRS)

The awareness enhancer

This is an **autonomous system of endogenous bio-resonance,** through which the client is brought to a state of **self-listening** in a totally new connected way, in order to stimulate the body's innate self-healing intelligence; it brings awareness and boosts physical and mental wellbeing.

All this is achieved through a few quick steps:

- **registration of electromagnetic signals** from the body through special electrodes
- **amplification of the signals** to values that are perceptible by the client
- **frequency modulation** or phase inversion
- **feedback of the amplified signal** to the client via electric, magnetic, light or sound applicators

Each session is pleasant, **non-invasive** and can last up to 30 minutes. The protocol is **very simple** to be implemented and is operator independent.

With this device, you can also create **customized physical solutions** and remedies, **stimulate the brain** to displaying colors and fractals to promote the release of emotions, **read the human electromagnetic bio-field** and conduct analysis of **Heart Rate Variability (HRV).**

Thanks to its ability to control two different signals in parallel, the device can operate in an integrated manner with the Informational System IS or the Frequency System FS, or with any external signal provided by the PC such as **music files**, making this bioresonance device a **unique self-listening tool** which increases self-awareness, like a **physical lens for the consciousness.**

<u>In summary</u>:

- ✔ *Acquisition of the electromagnetic signal of the client and consequent bioresonance treatment, through electricity, light and sound*
- ✔ *Dedicated software for Heart Rate Variability analysis*
- ✔ *Interfacing with the IS System for an integrated evaluation as well as individual treatments*
- ✔ *Large frequency database for the treatment of specific disorders (Rife and Clark)*

Hardware Accessories

Alongside the three basic systems, there is a whole range of accessories to work in an advanced modality with **electric, magnetic an light applicators**, satisfying the most diverse requirements.

Principles and basics of the CIEM System

Hi quality technology supported by innovative ideas

The CIEM System represents the fusion of the concepts of "**Information**" and "**Energy**" that finds application in this new technology, able to improve the therapeutic communication at an informational and energy level using frequency applicators. The CIEM System today benefits from all the most important **European Quality Certifications** and, thanks to scientific research, it is still evolving today.

PEAR experimental program

The CIEM System is based on **Princeton University's PEAR experimental program** (Princeton Engineering Anomalies Research) that proved, in a 30-year-long study, the interaction between the human consciousness and physical devices.This study gave birth to countless scientific publications on an international level.

Started in 1979 with the aim to study the i**nfluence of human consciousnes**s on observed **facts and reality**, this study has shown that the mind can directly affect the **REG output (Random Events Generator)** - an electronic device designed to generate a sequence of numbers or signals- that can not be reasonably predicted better than by a random chance. Human consciousness changes the REG output and it is possible to read this **representational signature pattern** of each person.

The **Informational System IS** presents a REG into the holographic generator, which is a sort of *human consciousness antenna* that generates and matches complex patterns between the client and the database, offering an abundance of information that in the past required multiple sessions and hundreds of analyses over a long period of time.

C.I.E.M. Model

Consciousness, Information, Energy, Matter

The CIEM System is programmed to analyze the informational structure that regulates all four levels of existence and their connections: matter, energy, information and consciousness.
Using the system the therapist can investigate and balance each of these realms, locating the main problems of the client – physical/material, energy flow, mental/emotional and/or spiritual - and then working on the restoration of full health.

Communication and awareness in patient/therapyst relationshop

The CIEM System is an **advanced communication tool** that enhances and integrates the communication and interpersonal skills of the therapist.

The operator can thus interface with patients as a kind of "**holistic counsellor",** who aims at increasing awareness and sense of self, directing them towards a healing path, using a comprehensive approach and adopting the paradigm that everything - body, mind and soul - are linked.
This new vision of the relationship between therapist and patient is now a necessity and goes beyond the disempowering relationship where the health practitioner decides alone what is best for the patient, to a more responsible relationship where the patient is well informed and at the centre of his own treatment.

Web sites

The community CIEM is active nationally and internationally, as evidenced by the forums, channels and websites.

Training and Professionals network

One of the strengths of the CIEM System is the **training** offered. The aim is to both introduce the concepts of energy and informational medicine through the use of the system, and to follow the customer in every phase of growth with the device. The user will also be able to join a large **network of international practitioners,** which will allow a direct interfacing with doctors and therapists, to share **protocols, clinical cases, applications and new methods.**

The training is structured in the following way:

Basic Courses

monthly meetings throughout Europe, held by biomedical engineers or experts, that give the opportunity to receive an adequate introduction to the systems and their applications, through energy and informational medicine and quantum physics.

Advances Courses

physicians and health professionals, experts in the field, who have strengthened their clinical practice on the CIEM System, present examples of clinical cases and protocols of use.

International Seminars

the best international experts teach the most advanced techniques of the CIEM System, illustrating methods that have led, in a short time, a large number of operators to make a **decisive leap forward** in terms of quality and sustainability of their own therapeutic practice.

Demo on site

as an alternative to the courses, the company is available for free demos at the Rome headquarters or in national centers around Europe, that will allow practitioners to try the complete system, assisted by the biomedical engineering staff or experts.
